STEP 2: Select a preprogrammed 256 MB CompactFlash Card containing detailed street-level mapping information for your geographical area. Use the regional map to identify the mapping coverage you prefer. Each card contains regionalized points of interest, detailed local street-level mapping and local information.

NORTH AMERICAN COVERAGE AREAS (Regions 1-9)

ALTERNATE COVERAGE AREAS (Regions 10-17)

Alternate coverage areas were created to overlap border regions. These areas allow residents near state lines the ability to be centrally located in a map region. For example, residents of eastern Indiana may choose region card #7 while residents of western Indiana may choose region card #13 if they frequently travel to Illinois.

As part of the DaimlerChrysler family, Mopar makes Original Equipment parts and accessories for Chrysler, Dodge and Jeep® vehicles. This means that a DaimlerChrysler engineering team has created the accessories featured in this publication utilizing the original designs and specifications. The result? Mopar Accessories that meet a higher standard than aftermarket accessories. Accessories with not just an attention to detail, but a dedication to detail.

THE MOPAR DIFFERENCE

It's this level of detail and thought that creates accessories with a real Mopar Difference. A difference in fit. In engineering. In testing. In materials. In safety standards. Even a difference in the way Mopar Accessories are designed to install on the vehicles.

In short, it's a Mopar Difference in each of the accessories featured on these pages that you'll recognize - and appreciate - for years down the road.

Materials Testing
Design Installation
Fit Safety

Mopar **Rear Spoilers** must pass many rigorous tests to ensure that they maintain their good looks and do not adversely affect the performance of the vehicle. Testing under extreme hot and cold temperatures checks the Rear Spoilers' ability to withstand severe conditions without cracking.

Weather-resistance tests ensure that the spoiler will maintain its premium finish in any climate. Pull tests help ensure that spoilers won't loosen or vibrate. Several other tests make certain that the weight of the spoiler does not affect normal deck lid operation, or compromise the integrity of the deck lid's hinges, latches and lock. Mopar Rear Spoilers, like all Mopar Accessories, are designed and tested for a seamless integration with DaimlerChrysler vehicles.

Mopar **Brush Guards** and **Grille Guards** are designed using advanced engineering software that allows engineers to exactly match the front end of any Dodge truck. However, it's more than a perfect fit. Mopar Deluxe Tubular Brush Guards and Grille Guards feature injection-molded ABS plastic components that ensure sturdy construction and a blemish-free surface.

Tubular Brush and Grille Guards are fashioned from heavy-gauge steel, then formed with an advanced mandrel tube-bending technology for a wrinkle-free appearance. The chroming process then includes more nickel to help prevent rust and cloudiness in the finish.

Electronic Accessories from Mopar are designed and thoroughly tested to guarantee compatibility with DaimlerChrysler electrical systems. Whether you upgrade your audio system or add a security or navigation system, DaimlerChrysler testing facilities help ensure that negative effects from outside interference -

such as commercial radio antennas and microwave towers - are almost non-existent. Testing also helps ensure that Mopar Electronic Accessories will not interfere with your other electrical or computer systems. In addition, unlike some other accessories on the market, Mopar Electronic Accessories meet DaimlerChrysler standards for current draw, so they won't draw down the vehicle's battery under normal conditions. You can be assured that even with several Mopar Electronic Accessories, lamps won't dim and engines won't stumble or stall.

Each Mopar **Running Board** is made to fit Minivans, Jeep[®] vehicles or Dodge Trucks exactly. Constructed of a sturdy roll-formed steel substructure, Running Boards pass stringent dynamic and static load tests. That means it'll stand up to daily use from heavy loads and minor impacts and will look good for years to come.

The high-impact-resistant plastic cladding that covers Mopar Running Boards also improves durability and won't shatter, as fiberglass designs might. In addition, the cladding helps guard against chipping, fading and cracking. Even the step surfaces feature a slip-resistant material. Furthermore, paint is not just a close match - it's an exact factory-matched color.

Mopar **Racks and Carriers** are designed and built to strict Dodge, Chrysler or Jeep specifications. This more demanding standard is ensured through access to DaimlerChrysler laboratories and testing sites - facilities not available to aftermarket accessory manufacturers. All Mopar Racks and Carriers are subjected to a series of demanding tests before they are offered. Mopar utilizes the DaimlerChrysler Proving Grounds to measure the durability in extreme conditions. Harsh road tests measure the component interaction and part durability on the vehicle.

We use wind tunnel testing to minimize noise and vibration, as well as fit and function to ensure damage-free installation and use on every vehicle. In addition, Mopar Racks undergo strenuous tests in which the racks are loaded to maximum capacity and then subjected to an extreme forward force to simulate a hard stop; an angular force to simulate a sharp vehicle turn; and a severe upward pull to test air resistance at high speeds.

In addition, each rack and carrier is custom designed to provide a tight, vibration-free fit - unlike many "universal fit" accessories available.

Mopar **Wheels** feature tough, cast aluminum construction and are specifically designed for an exact fit on Chrysler, Dodge or Jeep vehicles. Wheel hubs, unlike "universal fit" wheels, mount on the wheel studs. This exact fit means that wheels turn true, which translates into less vehicle vibration and a smoother ride.

Every Mopar Wheel is also designed to be used with existing chrome lug nuts and standard wheel weights. In addition, the surface of both painted and polished wheels is glazed with a Clear Coat finish that requires only a normal washing effort - no tedious repolishing on a regular basis to maintain their like-new appearance, as with some other types of wheels.

To help ensure everyone's safety, each Mopar Wheel also undergoes stringent DaimlerChrysler testing, and must pass many other tests - including a simulated curb-impact test - to meet demanding fit, performance and durability standards.

Mopar offers several **Tubular Products** for Dodge Trucks and Jeep vehicles: Front and Rear Bumpers, Grille Guards, Brush Guards, Side Steps and Light Bars. All are designed to blend perfectly with the unique lines of the vehicle, and are available in a variety of finishes. Mopar tubular products are fashioned from heavy-gauge steel or aluminum, then formed with an advanced mandrel tube-bending technology for a clean, wrinkle-free appearance. These tubular products are designed to enhance the appearance of Dodge Trucks and Jeep vehicles, and they resist road debris and inclement weather conditions without chipping, corroding, pitting or scratching. All mounting hardware meets DaimlerChrysler Materials Standards for corrosion protection.
