- Ⓒ Hodnoty momentů jsou poníženy o -10% oproti tabulkovým hodnotám. Šroubové spoje utahujte dle vyznačeného utahovacího momentu v dokumentaci. Pokud není utahovací moment v dokumentaci vyznačen, utahujte dle obecné tabulky. Pokud je v dokumentaci definován spoj šroubu a matice o různých pevnostech, vždy utahujte na moment komponenty nižší.
- Ⓓ Die Werte der Anzugsmomente sind um 10 % gegenüber den Tabellenwerten verringert. Ziehen Sie die Schraubverbindungen gemäß dem in der Dokumentation festgeschriebenen Anzugsmoment an. Sofern das Anzugsmoment nicht in der Dokumentation aufgeführt ist, ziehen Sie sie gemäß der allgemeinen Tabelle an. Wenn in der Dokumentation eine Verbindung von Schraube und Mutter mit verschiedene Festigkeiten definiert ist, wird immer mit dem Moment des Bauteils mit der geringeren Festigkeit angezogen.
- Ⓕ Les valeurs des couples de serrage sont baissées de 10% par rapport aux valeurs de tableau. Serrez les raccords à vis selon le couple de serrage indiqué dans les documents. Si le couple de serrage n'est pas indiqué dans les documents, serrez selon le tableau général. Si les documents définissent un assemblage par boulon de diverses résistances, serrez toujours au moment de la composante avec résistance inférieure.
- Ⓖ The torque values are reduced by 10% compared to the table values. Tighten the screw joints according to the tightening torque stated in the documentation. If the tightening torque is not stated in the documentation, tighten according to the general table. If there is a joint with a screw and a nut at different strengths in the documentation, always tighten to the torque of the component with lower strength.
- Ⓔ Значения моментов затяжки уменьшены на 10% по сравнению с данными в таблице. Резьбовые соединения зажимайте с установленным в документации моментом зажатия. Если в документации не указан момент зажатия, то зажимайте по действующей в общем таблице. Если в документации установлено соединение из болта и гайки различной прочности, всегда зажимайте с моментом для компонента с меньшей прочностью.
- Ⓗ Wartości momentów dokręcania są obniżone o 10% w stosunku do wartości z tabeli. Połączenia śrubowe należy dokręcać zgodnie z momentem obrotowym w dokumentacji. Jeśli w dokumentacji nie ma podanego momentu obrotowego, należy dokręcać zgodnie z ogólną tabelą. Jeśli w dokumentacji zdefiniowane jest połączenie ze śrubą nakrętką różnych wytrzymałościach, zawsze należy dokręcać zachowując moment dokręcania komponentu z niższą wytrzymałością.
